Rohrer Aesthetics guarantees if in 30 days you aren’t fully satisfied that the Phoenix is perfect for your practice, we’ll gladly refund your deposit in full. Quickly regain your return on investment with gold standard technology that can easily transport between multiple offices. Best value with no hidden cost of consumables. The Phoenix turns up the heart with its sheer multifunctionality.
Since 2014 the innovative designs from Rohrer Aesthetics, LLC (Birmingham, Ala.) have provided physicians with safe, fast and affordable options when purchasing aesthetic laser systems.

The company’s president and managing member, Mark Rohrer, originally founded Sandstone Medical Technologies, LLC in 2000, which delivered aesthetic lasers and IPL systems that offered solid return on investment. Twelve years later Cynosure acquired the assets of Sandstone Medical, setting Mr. Rohrer on the path to creating Rohrer Aesthetics, LLC.

When Mr. Rohrer created Rohrer Aesthetics, his goal was to provide the perfect aesthetic laser system. After speaking with several physicians, he quickly learned that the following five qualities influence their decision when purchasing a cosmetic laser device: Versatility, efficacy, affordability, warranty / service contracts, and consumables / disposables.

Considering these key points, Rohrer Aesthetics designed the Spectrum Multi-Platform Laser/IPL. Since its introduction in late 2015, over 200 Spectrum systems have been sold. “While we have all heard you can’t be everything to everybody, we feel we have done a near perfect job with the Spectrum,” said Mr. Rohrer.

“The Spectrum laser is outstanding because of its surprising versatility,” said Bobby Buka, M.D., J.D., a dermatologist in New York, N.Y. “I’ve been in practice for ten years, and spent hundreds of thousands of dollars buying multiple laser systems before finding the Spectrum, which can do it all. It’s powerful, reliable and gets used in my office multiple times every day. I can’t say that about any other piece of equipment in my practice.”

Priced under $55,000, the Spectrum includes four lasers (810 nm diode for hair removal, Er:YAG for skin resurfacing, Q-switched YAG and KTP for tattoo removal, long pulsed YAG for removing vascular lesions), and an intense pulsed light (IPL) for the reduction of brown spots, matted facial veins and acne, all in one system.

According to Adam J. Rubinstein, M.D., F.A.C.S., a plastic surgeon in Aventura, Fla., the Spectrum is by far the best value on the market when it comes to multi-platform laser/IPL systems. “There is no other device that offers as many modalities in one platform at such a reasonable price,” he stated.

In addition, the Spectrum features a 2-year warranty (additional coverage can be purchased) and does not include any consumables or disposables. What’s more, Rohrer Aesthetics offers an exclusive and unmatched “Buy Back Guarantee,” where a physician can use the Spectrum for 30-days after their on-site, clinical in-service in order to experience the system and the results it can produce. If at any time during that period, the physician decides the Spectrum isn’t meeting their needs, they can return it to Rohrer Aesthetics and receive a refund on their deposit. And the company will buy back the Spectrum at any time during the first year of ownership at 50% of the sale price.

“The service from Rohrer Aesthetics is top notch,” Dr. Rubinstein shared. “A great device, great support and great results. You won’t find anything like it anywhere else.”

Dr. Buka agreed, “Rohrer’s customer service is outstanding. I felt like not only had I bought a stunning piece of technology, but the entire company behind it as well.”
